Core information

Role title:	Grant Support Coordinator	Remuneration:	£28,000 - £35,000
Working hours:	Full-Time	Start Date:	ASAP
Reports to:	CEO/Head of Innovation	Location:	London, E20 3BS

Position and Our Company

ALP Technologies is a profitable renewable engineering energy company based in London, Berlin and New York. We have won numerous awards on research and development projects for technologies to benefit lower income countries covering several different innovative fields and technologies. Our company is designing, prototyping, and testing a state-of-the-art li-ion battery storage system (M-BRIC) that is the smartest and lowest cost in the world for 2 billion people to access renewable energy.

At Alp, we see the people as the value of our system and as the core of our innovation. We operate with an agile mindset and tackle problems always considering the business case and root cause.

We are a small but fun young company, where everyone shares the same drive to provide electricity to rural areas in low income countries where people need it the most. We believe that efforts should be invested in fulfilling basic human needs first before focusing technology efforts on improving the already good. You can find us in our office in Hackney Wick, where bars and pubs are not far to enjoy some after work drinks with the team.

We are looking for a perceptive, thorough and supportive Grant Support Coordinator, who will identify and apply for various grants and meet the organisation's needs, assisting the Grant Manager with the grant process from beginning to end.

- Accommodating the needs of the Grant Manager in assembling and submitting grant requests, including letters, proposals, budgets, and presentations
- Track and create a calendar of grant opportunities including deadline dates and required materials
- Aiding in researching and defining appropriate grant opportunities, funding opportunity themes, understand content and schedule deadlines
- Supporting in the completion and submitting of grant applications with attention to detail
- Assisting in the creation of the quarterly grant reporting

Ideally you would have a background in an early stage fast growth company or can demonstrate relevant experience and ambition to manage one.

Highly organized personality trait and project management experience are a must.

Skill Requirements					
	Requirements	Essential/			
		Desirable			
Qualifications	Bachelor's Degree in a relevant field and a passion for renewable energy	Е
